## Sabrina Palm, Frontend Developer

Experienced Frontend Developer with a passion for all things frontend related. I thrive on creating intuitive user interfaces, testing my code to perfection, and debugging like a boss. From implementing features, design to maintenance, I've got you covered. I'm a self-starter who can work independently or as part of a team to bring your web applications to life.

### Employment History

#### Frontend Developer Consultant at Knowit Experience, Gothenburg

February 2023 — Present

I work with multiple clients to develop their e-commerce/informational websites, tailoring each site to meet their specific needs and requirements. My responsibilities include maintenance of the current codebase, troubleshooting and resolving issues to ensure that the websites I work on operate at peak performance. I also act as a Frontend Lead/Mentor when needed, guiding and mentoring team members to achieve project success.

A variety of technologies are used, such as TypeScript, JavaScript, React, Next.js, Jetshop Flight, CSS, Sass, Tailwind CSS, and Linaria CSS. For code hosting, GitLab and Azure DevOps are utilized, and for project and task management, JIRA and Azure DevOps are used.

#### Frontend Developer at Etraveli Group, Gothenburg

January 2020 — February 2023

As a Frontend Developer at Etraveli Group, I developed new features and maintained continuous delivery of the platform for major travel agencies such as Flightnetwork, GoToGate, and MyTrip using React, JavaScript, and GraphQL. I utilized styled components, Emotion, our own built component library Flight, and CSS for user experience. I managed code through Bitbucket and tasks through JIRA, while using Jest, React Testing Library, and TestCafé for testing. Collaboration with development teams and product owners was vital. I won 1st place at the December 2022 Hackathon.

#### Frontend Web Developer at Forza Football, Gothenburg

January 2019 — December 2019

As a Frontend Developer for the Forza Football app, I developed mobile-first web ads using Adzerk's APIs, Google Ad Manager, and Grunt. I also maintained the Forza Challenge web app built using React and ES6 JavaScript.

For code hosting and task management, I used Github. The primary goal was to improve conversion rates and drive revenue growth by meeting the needs of the app's target group and users, such as integrating sign-up functionality with betting partners to enhance the user experience.

My main focus was on ensuring the continued success of the app and user satisfaction during my time at Forza Football.

## Frontend Developer/UI Designer at Orbi, Gothenburg

March 2018 — February 2019

As a Frontend Developer/UI Designer at Orbi, I created a web interface and mobile application that catered to the specific needs of the target group and users. I improved the user experience for administrators and end users by developing new features and implementing intuitive design elements, utilizing Adobe XD to design user flows, wireframes, and prototypes.

Throughout the development process, I followed the agile project methodology Scrum and utilized technologies such as React/React Native, Redux, Material-UI design library, and Adobe XD.

My work at Orbi focused on creating a user-friendly and engaging experience that met the needs of target users and administrators. I was dedicated to delivering optimal results for the team and the project.

### Education

## Advanced Higher Vocational Education Diploma, Frontend Development, EC Education, Gothenburg

August 2017 — May 2019

My education centered on the development of highly functional and responsive web applications. With a strong emphasis on structured programming in JavaScript, I gained a thorough understanding of how to create powerful web-based tools. Additionally, I completed courses in HTML and CSS, User Experience design, graphics programming, NodeJS, React.js, Vue.js, mongoDB, server-side rendering, and TDD (Jest / Enzyme). I also honed my project management skills using Agile methodology Scrum to ensure efficient and effective project delivery.

## Associate Degree, Web Communication, GRvux

During my studies in Web Communication, I delved into the art of crafting effective messaging for social media and various online platforms. My coursework emphasized the importance of understanding one's target audience and tailoring content accordingly, utilizing a range of mediums such as text, graphic design, and photography. Additionally, I gained valuable skills in web design, media production, and multimedia that have allowed me to create engaging and dynamic online experiences.
