01 PROFILE

Experienced Frontend Developer with a passion for all things frontend related. I thrive on creating intuitive user interfaces, testing my code to perfection, and debugging like a boss. From implementing features, design to maintenance, I've got you covered. I'm a self-starter who can work independently or as part of a team to bring your web applications to life.

02 EMPLOYMENT HISTORY

02/2023 — Present

Frontend Developer Consultant at Knowit Experience
Gothenburg

I work with multiple clients to develop their e-commerce/informational websites, tailoring each site to meet their specific needs and requirements. My responsibilities include maintenance of the current codebase, troubleshooting, deploying and resolving issues to ensure that the websites I work on operate at peak performance. I also act as a Lead/Mentor when needed, guiding and mentoring new team members to achieve project success.

A variety of technologies are used, such as TypeScript, JavaScript, React, Next.js, Jetshop Flight, CSS, Sass, Tailwind CSS, Linaria CSS and SaaS - Norce. For code hosting, GitLab and Azure DevOps are utilized, and for project and task management, JIRA and Azure DevOps are used.

01/2020 — 02/2023

Frontend Developer at Etraveli Group
Gothenburg

As a Frontend Developer at Etraveli Group, I developed new features and maintained continuous delivery of the platform for major travel agencies such as Flightnetwork, GoToGate and MyTrip using React, JavaScript and GraphQL. I used styled components, Emotion and our own component library Flight for styling and user experience. Managing code through Bitbucket and tasks through JIRA, while using Jest, React Testing Library, and TestCafé for testing. Collaboration with other development teams and product owners was vital. Additionally, won 1st place at the December 2022 Hackathon.

01/2019 — 12/2019

Frontend Web Developer at Forza Football
Gothenburg

As a Frontend Developer for the Forza Football app, I developed mobile-first web ads using JavaScript, HTML, CSS, Adzerk's APIs, Google Ad Manager and Grunt. I also maintained the Forza Challenge web app built using React and ES6 JavaScript.

For code hosting and task management, GitHub was used. The primary goal was to improve conversion rates and drive revenue growth by meeting the needs of the app's target group and users, such as integrating sign-up functionality with betting partners to enhance the user experience.

My main focus was on ensuring the continued success of the app and user satisfaction during my time at Forza Football.

03/2018 — 02/2019   **Frontend Developer/UI Designer at Orbi**   *Gothenburg*

As a Frontend Developer/UI Designer at Orbi (prev Bonsai Campus), I created an admin interface and a associated mobile application that catered to the specific needs of the target group and users. Improved the user experience for administrators and end users by developing new features and implementing intuitive design elements, utilizing Adobe XD to design user flows, wireframes and prototypes.

Throughout the development process, We followed the agile project methodology Scrum and used technologies such as React/React Native, Redux, Material-UI design library and Adobe XD.

My work at Orbi focused on creating a user-friendly and engaging experience that met the needs of users and administrators. I was dedicated to delivering optimal results for the team and the project.

03 EDUCATION

Aug 2017 — May 2019   **Frontend Development, EC Education**   *Gothenburg*

Advanced Higher Vocational Education Diploma

My education centered on the development of highly functional and responsive web applications. With a strong emphasis on structured programming in JavaScript, I gained a thorough understanding of how to create powerful web-based tools. Additionally, I completed courses in HTML and CSS, User Experience design, graphics programming, NodeJS, React.js, Vue.js, mongoDB, server-side rendering and TDD (Jest / Enzyme). I also honed my project management skills using Agile methodology Scrum to ensure efficient and effective project delivery.

Web Communication, GRvux

Associate Degree

During my studies in Web Communication, I delved into the art of crafting effective messaging for social media and various online platforms. My coursework emphasized the importance of understanding one's target audience and tailoring content accordingly, utilizing a range of mediums such as text, graphic design, and photography. Additionally, I gained valuable skills in web design, media production, and multimedia that have allowed me to create engaging and dynamic online experiences.

04 SKILLS

React	HTML & CSS
Next.js	CSS in JS
JavaScript	Unit testing
TypeScript	E2E testing
