Gothenburg, Sweden · sabrinawolfpalm@gmail.com

Sabrina Palm, Frontend Developer

Experienced Frontend Developer with a passion for all things frontend related. I thrive on creating intuitive user interfaces, testing my code to perfection, and debugging like a boss. From implementing features, design to maintenance, I've got you covered. I'm a self-starter who can work independently or as part of a team to bring your web applications to life.

Employment History

Frontend Developer Consultant at Knowit Experience, Gothenburg

February 2023 — Present

Responsibilities:

- I work with multiple clients to develop their e-commerce websites, tailoring each site to meet their specific needs and requirements.
- Maintenance of the current codebase, troubleshooting and resolving issues to ensure that the websites I work on operate at peak performance.
- Act as a Frontend Lead when needed, guiding and mentoring team members to achieve project success.

Technologies used:

- TypeScript, JavaScript, React, Next.js, Jetshop Flight, CSS, Sass, Tailwind CSS, and Linaria CSS
- Code hosting: GitLab and Azure DevOps
- Project and task management: JIRA and Azure DevOps
- Required skills: flexibility, adaptability, high standards of code quality and user experience.

Frontend Developer at Etraveli Group, Gothenburg

January 2020 — February 2023

As a Frontend Developer at Etraveli Group, my responsibilities included:

- Served some of the largest travel agencies in the world, including Flightnetwork, GoToGate, and MyTrip.
- Developed new features and ensured continuous delivery of the platform using React, JavaScript, and GraphQL.
- Utilized a variety of tools and technologies, including styled components, Emotion, our own built component library Flight, CSS, for user experience.
- Used Bitbucket for code hosting and JIRA for task management.
- Tested code using Jest and React Testing Library for functions and unit testing, as well as TestCafé for E2E testing.
- Worked closely with other development teams and product owners.
- Additionally, won 1st place at the Hackathon in December 2022.

Frontend Web Developer at Forza Football, Gothenburg

January 2019 — December 2019

As a Frontend Developer for the Forza Football app, my responsibilities included:

- Developing mobile first web ads using Adzerk's APIs, Google Ad Manager, and Grunt as a task runner
- Maintaining the Forza Challenge web application, which was built using React with ES6 JavaScript
- Improving conversion rates and driving revenue growth by catering to the specific needs of the app's target group and users
- Integrating sign-up functionality with betting partners to enhance the overall user experience

Frontend Developer/UI Designer at Orbi, Gothenburg

March 2018 — February 2019

As a Frontend Developer/UI Designer for Orbi, my responsibilities included:

- Created a web interface and mobile application that catered to the specific needs of the target group and users
- Improved the user experience for both administrators and end users by developing new features and implementing intuitive design elements
- Designed user flows, wireframes, and prototypes in Adobe XD.
- Focused on understanding the needs and preferences of the application's target groups and users.
- Aimed to deliver an intuitive and engaging experience for the users.
- Followed agile project methodology Scrum throughout the development process to ensure optimal business benefits
- Technologies used: React/React Native, Redux state container, Material-UI design library and Adobe XD

Education

Advanced Higher Vocational Education Diploma, Frontend Development, EC Education, Gothenburg

August 2017 — May 2019

My education centered on the development of highly functional and responsive web applications. With a strong emphasis on structured programming in JavaScript, I gained a thorough understanding of how to create powerful web-based tools. Additionally, I completed courses in HTML and CSS, User Experience design, graphics programming, NodeJS, React.js, Vue.js, mongoDB, server-side rendering, and TDD (Jest / Enzyme). I also honed my project management skills using Agile methodology Scrum to ensure efficient and effective project delivery.

Associate Degree, Web Communication, GRvux

During my studies in Web Communication, I delved into the art of crafting effective messaging for social media and various online platforms. My coursework emphasized the importance of understanding one's target audience and tailoring content accordingly, utilizing a range of mediums such as text, graphic design, and photography. Additionally, I gained valuable skills in web design, media production, and multimedia that have allowed me to create engaging and dynamic online experiences.
